# TECU® Patina

## New diversity for a green facade.

*The scope of design options for architects and installers alike has been increased by the addition of four variants to the range of industrially pre-patinated surfaces of the contemporary classic TECU® Patina.*

Often the shortest path leads you directly to your goal. If the design concept calls for the vigour and force of expression of the green patina finish typical for copper, then it should be put into practice immediately – without a long wait for the gradual effects of natural weathering. There is a name to the solution: TECU® Patina – industrially pre-patinated copper for immediate use to satisfy the highest aesthetic demands in building design. The product portfolio has now been extended by four variants:

- TECU® Patina\_Hamburg
- TECU® Patina\_Boston
- TECU® Patina\_Oslo
- TECU® Patina\_Madrid

As a result, KME is now in a position to additionally offer four archetypal versions of natural patina, based on the proven industrial manufacturing procedure for the well-known TECU® Patina. The expansion of the TECU® Patina line of products therefore provides architects, installers and planners with additional design options, which will certainly also meet with great interest in the field of historic building preservation. TECU® Patina again proves to be extremely versatile, as is typical for natural surfaces.

The many different nuances and shades of the surface blend only gradually. After installation the surfaces continue to develop in a completely natural manner being characteristic of copper. The individual development is extremely fascinating – just as modern architecture should be.

Another decisive advantage is the certification as an environmentally friendly building product in accordance with ISO 14025 and EN 15804. No matter which variant you choose, TECU® Patina is made exclusively and to 100% of recycled copper. This significant added value of many TECU® products can be a decisive argument in favour of use in buildings with LEED, BREEAM or DGNB certificates, which are increasingly in demand, particularly for public buildings. TECU® Ecological Copper complies in all properties with materials made of new metals and surpasses all requirements of the European standard EN 1172.

TECU® stands for the combination of high quality and comprehensive service. As one of the worldwide leading producers of copper and copper alloy semis, KME with its application-related consultation services provides supports for planners, architects and installers, even beyond the European borders.

### Product Range: TECU® Patina

Sheets Formats/Thickness	0,6	0,7	1,0	1,2	1,5	2,0	4,0*
600 x 3000	O	X	O				
670 x 3000	X	X	O				
800 x 3000	O	O	O				
1000 x 2000	X	X	O	O	O	O	
1000 x 3000	X	X	O	O	O		O

X = on request > 40 sqm    O = on request > 3,000 kg
