

KME-product: semi-finished products from copper with low alloying components

Revised at: 01.07.2020

Information sheet for articles

1. Identification of the article and of the supplier

Supplier/Manufacturer // Application and use of the articles

KME SE affiliates, hereinafter referred to as KME, manufacture and supply products made of copper and copper alloys in the form of semi-finished products like hot and cold rolled bands, plates, sheets and strips, pressed and drawn pipes, tubes, profiles, rods, wires, rope and strands, stamping parts, either uncoated or with tinned surface.

Remark

Semi-finished products from copper and copper alloys are articles according to Regulation (EC) No. 1907/2006 (REACH Regulation). For articles it is not mandatory by law to issue a safety data sheet. To provide information to our customers this voluntarily information sheet was compiled, but it is not subject to the formal requirements of the REACH Regulation.

2. Hazard identification

When supplied in solid form the articles from copper and copper alloys are non-hazardous. If they are subsequently processed in any way which might produce airborne dust or fumes, for instance by dry grinding, abrading, electro discharge machining, melting or welding (the material itself) then an inhalation hazard could arise.

General handling, stamping, forming and most machining operations are non-hazardous. Heat treatment in air up to about 400 °C is non-hazardous but higher temperatures may give rise to loss of oxide, which could cause hazardous inhalation. This can be avoided by treatment in inert atmosphere.

3. Composition / information on ingredients

Description: Copper alloy (metal in compact form)

Material codes: copper alloy

| KME material Trade name | EN Material code (CEN/TS 13388:2013) | EN Material number (CEN/TS 13388:2013) | ASTM UNS-number |
|----------------------------|--|--|--------------------|
| NAB G 10, DLPS-Cu | CuAg0,10(P) | CW 016 A | C 10700, C12100 |

The classifications mentioned below reflect the classification of the responding pure substance and are for information only. Copper alloys are special preparations according to Regulation (EC) 1907/ 2006 (REACH).

Classified alloy components (respective to individual alloy)

| Number | Name of component | Classification | Content/ remark |
|--------|-------------------|----------------|-----------------|
| - | - | - | - |

Additional alloy components (respective to individual alloy)

| Number | Name of component | Classification | content |
|-------------------------------------|-------------------|----------------|------------|
| CAS: 7440-50-8 EINECS: 231-159-6 | Copper | - | Balance |
| CAS: 7723-14-0 EINECS:231-768-7 | Phosphorus | - | Max 0,15 % |
| CAS: 7740-22-4 EINECS:231-131-3 | Silver | - | Max 0,1 % |

4. First aid -measures

General information: There is no acute risk associated and no special measures required.

| Exposure | Measures |
|--------------|---|
| Inhalation | Ensure supply of fresh air. In the event of symptoms refer to medical treatment. In practice any exposure can only arise from operations such as grinding, abrading, electro discharge machining, welding or melting and is likely to be at low levels which will not cause immediate symptoms. |
| Skin contact | Normally no skin irritation. |
| Eye contact | Rinse thoroughly with plenty of water and seek medical advice. Use normal industrial protection to protect against foreign bodies entering the eyes. |
| Ingestion | In the event of symptoms refer to medical treatment. Use normal industrial hygiene. |

5. Firefighting measures

| | |
|--------------------------------------|--|
| suitable extinguishing agents | Use fire extinguishing methods suitable to surrounding conditions. |
| Protective equipment | No special measures required |

6. Accidental release measures

| | |
|---------------------------------|------------------------------|
| Personal Protection | Not required, not applicable |
| Environmental protection | Not required, not applicable |

7. Handling and storage

| Handling and storage | Measure |
|--|--|
| Protection of personal health and environment | Control are only applicable to any process which might produce airborne dust or fumes, which are subject to Health and Safety Executive Maximum Exposure as shown in chapter 8 |
| Storage, Co-storage, maximum storage | No special requirements. Look for surrounding conditions. |

8. Exposure controls and personal protections

Limitation and control of the exposure at the working place

If breathable dust or smoke occurs by machining, the exposition to workers should be controlled with a exhaust filter system to meet the limit values. As an additional measure personal protection as a filter mask or an independent breathing helmet may be used.

Occupational Exposure Limit Values for possible hazards during processing

Link to GESTIS International Limit Values: http://limitvalue.ifa.dguv.de/WebForm_gw2.aspx

| Personal protective equipment | Recommendation |
|-------------------------------|--|
| Respiratory | Use an industrial filter mask (type P2) when work-place limits are exceeded. |
| Hands | Protective gloves are recommended, depending on the handling. |
| Eyes | Eye protection is recommended, depending on the processing. |
| Body | Wear suitable protective clothing, depending on the processing. |

9. Physical and chemical properties

| Parameter | description |
|--------------------------------------|---|
| Colour | copper red |
| State of aggregation | solid |
| Density | ca. 8,9 g/cm ³ (Lit.) |
| Solubility in water | insoluble |
| Odour | odourless |
| Melting point | 1083 °C (Lit.) |
| Boiling point / boiling range | undetermined |
| Flash point | Not applicable |
| Ignition (solid, gaseous) | Not applicable |
| Explosion occurrence | - No danger in solid form - In case of melted metal risk of explosion by contact with water. |

10. Stability and reactivity

Conditions to avoid: No decomposition if used to specification.

Contact to mercury, ammonia, ammonium chloride, ammonium hydroxide, ammonium nitrate, acetylene, chlorine-gas, hydrogen peroxide and various acids may be incompatibility.

A corrode reaction with uncontrolled heating effects could occur.

11. Toxicology information

General information:

When used and handled according to specifications, the article does not have any harmful effects to our experience.

On skin: No irritant effect.

On eye: No irritating effect.

Sensitization: No sensitizing effects known.

12. Ecological information

General notes

Semi-finished articles from copper and copper-alloys are practically insoluble in water.

Potential of bioaccumulation

Copper is a basic essential element, it will not be accumulated, but by some living stored for later use.

13. Disposal considerations / Recycling

KME confirm that the articles from copper and copper alloys could and should be recycled by end of life in accordance with Annex II to Directive 75/422/EEC for the recovery operation R4 (recycling / reclamation of metals).

Classification according to the Waste Catalogue Ordinance

KME is authorized to receive and recover waste from copper and copper alloys each broken down by source:

| Origin of the waste in according with EWC | EWC-Waste Code | Description |
|---|--|---|
| Waste metal | 02 01 10 | Waste metal |
| Slags from primary and secondary production | 10 06 01 | Slags from primary and secondary production |
| Other particulates and dust | 10 06 04 | Other particulates and dust |
| Other particulates and dust | 10 08 04 | Other particulates and dust |
| Furnace slag | 10 10 03 | Furnace slag |
| Other particulates other than those mentioned in 10 10 11 | 10 10 12 | Other particulates other than those mentioned in 10 10 11 |
| Wastes from copper hydrometallurgical process other than those mentioned in 11 02 05 | 10 02 06 | Wastes from copper hydrometallurgical process |
| Waste from mechanical design processes | 12 01 03 | Non-ferrous metal chips |
| disassemble of old cars | 16 01 18 | Non-ferrous metal |
| Metals (including alloys) | 17 04 01 17 04 03 17 04 06 17 04 07 | copper, bronze, brass lead tin mixed metals |
| Waste from shredding of metal-containing waste | 19 10 02 | Non-ferrous metal waste |
| Wastes from the mechanical processing (e.g. sorting, crushing) | 19 12 02 19 12 03 | Non-ferrous metal |
| municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions | 20 01 40 | Non-ferrous metal |

EU-transboundary shipment of waste Directive

| Classification | Waste Code | Description |
|---|------------|--------------|
| B1 metals and metal containing waste, in massive form | B1010 | Copper scrap |

Contact KME or local metal dealer for recycling information.

14. Transport information

There is no special risk of carrying copper alloys in solid form, either as a primary product or as scrap. EEC hazard labelling is not required.

Apply suitable measures concerning load securing in due consideration to dimension and mass of the articles.

15. REACH / SVHC

Labelling in accordance to the EC-regulations and SVHC candidate list

Semi-finished articles from copper and copper-alloy are not a substance or mixtures according to Regulation (EC) No. 1272/2008 on classification, labelling and packaging of substances and mixtures (GHS/CLP regulation).

The articles and packaging do not contain any of the particularly alarming substances (SVHC) mentioned in the candidate list in concentrations of more than 0.1% (w/w), at the time of the revision date of this information sheet.

(SVHC-candidate list updated by ECHA)

Link to see the current candidate list: <https://echa.europa.eu/de/candidate-list-table>

16. Information regarding other regulations

The products from copper and copper-alloy (with tinned or uncoated surface) have a chemical composition in accordance with the below listed Directives of the European Parliament and of the Council and Council/Commission Decisions and mentioned regulations:

| Item | Regulation |
|--|--|
| ELV | DIRECTIVE 2000/53/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 September 2000 on end-of life vehicles (so-called ELV) according amendment of Annex II (2008/689/EG) |
| GADSL | VDA 232-101 Global Automotive Declarable Substance List (GADSL) |
| RoHS-3 (assessment based on DIN EN 50581) | DIRECTIVE 2011/65/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 08 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment. COMMISSION DELEGATED DIRECTIVE (EU) 2015/863 of 31 March 2015 amending Annex II to Directive 2011/65/EU (RoHS 3) COMMISSION DELEGATED DIRECTIVE (EU) 2017/2102 of 15 November 2017 amending Directive 2011/65/EU COMMISSION DELEGATED DIRECTIVE (EU) 2018/741 of 01 March 2018 amending Annex III to Directive 2011/65/EU <u>In case of lead-containing alloy applied exemption according annex III:</u> <i>6c) Copper alloy containing up to 4 % lead (w/w) (exemption extend until 21. July 2021)</i> |
| DecaBDE | China-RoHS SJ/T 11363-2006) |
| WEEE | DIRECTIVE 2005/717/EG of 1st July 2008 Flame retardant DecaBDE in electrical and electronic appliances. For KME articles (semi-finished products) this directive is not applicable. |
| POP Stockholm Convention | POP-Directive REGULATION (EU) 2019/1021 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 20 June 2019 on persistent organic pollutants to recast and repealing EG/850/2004 and associated amendments |
| PFOS | Directive 2003/11/EG (Pentabromdiphenylether, Octabromdiphenylether) and 2006/122 EG (PFOS) of the EUROPEAN PARLIAMENT AND OF THE COUNCIL to change 76/769/EG for the use of dangerous substances and dangerous products. The products are free from PAH. |
| Ozone-Layer | Regulation (EC)1005/2009: Substances that Deplete the Ozone Layer |
| Packaging material | Directive 94/62/EC (packaging and packaging waste) |
| Siloxane | The products are free from Octamethylcyclotetrasiloxane (D4) (EC No: 209-136-7, CAS No: 556-67-2) and Decamethylcyclopentasiloxane (D5) (EC No. 208-764-9, CAS No. 541-02-6) |
| - Cr VI - asbestos - mercury | The products are free from hexavalent chromium (CrVI) and asbestos There is no use of mercury in our alloy composition |

17. Disclaimer

We confirm that the information involved in the drawing up of this document has been checked to the best of our knowledge for completeness, correctness and current relevance. They are given for a safe and proper use of our articles. These given data don't have the meaning of warranted characteristics of the specific delivered articles.

We shall inform our customers about mistakes which transpire to exist in information included in this information sheet as well as about amendments about which we become aware prior to a delivery. We declare our agreement with the fact that our information is to be used by our customers along the supply chain.
