

Ionising Radiation: Communication within supply chain¹

01.07.2020

Manufacturer's Declaration

All products guaranteed to be free of additional ionising radiation

All incoming raw materials and utilities, including raw metals, are subjected to an intensive inspection. Within the scope of this inspection, a test is also carried out on relevant incoming materials with regard to ionising radiation.

This enables us to ensure that exclusively materials, which are naturally composed, i.e. free of artificial ionising radiation, are used in the production.

We confirm that all materials supplied by the KME Germany GmbH & Co. KG affiliates are composed of natural elements and that no additional ionising radiation ensues from these products.
