

KME - Spain S.A.

Integrated Management Policy

MISSION

KME SPAIN's corporate mission is to offer the following services: the Storage, Slitting Process and Marketing of Copper materials and alloys thereof as well as Zinc and Aluminium alloys and other metal materials; to generate the maximum added value to our customers with the total involvement of our employees.

VISION

Our vision is to be the leader within our sector, obtaining that position by the quality of the product we offer and the service provided to our customers and our earnest consideration with respect to the environment.

VALUES

1. All of our products and services must meet the requirements of the customer, as well as legal (including the prevention of workplace accidents and personal data protection), regulatory and other requirements subscribed.
2. The high level of commitment with respect to the needs of our internal and external customers.
3. The establishment of strong, close and lasting relationships with our customers.
4. The continuous improvement of the effectiveness and efficiency of our integrated management system (quality, environment and health and safety at work and personal data protection), that allows maximum adaptation to the expectations of our customers and society in general.
5. The continuous assessment of the risks associated with our business, both in terms of quality, environment, health and safety, and personal data protection in our operations and activities, both current and future with the aim to eliminate or at least minimize them as much as possible.
6. To achieve at all times, the safety of all involved, the material goods, as well as the protection of the environment and the confidentiality and integrity of the personal data.
7. To promote the participation, information, training and consultation of staff, including temporary workers and external collaborators who work within our facilities, to maintain a high level of prevention, recycling and awareness in our organisation.
8. The efficient and rational use of natural resources and the prevention of pollution produced in our activities, to ensure safe, recyclable and energy efficient products and to minimize any negative impact to the environment.
