

# C10100

## Cu-OFE

### Alloy Designation

|                  |        |
|------------------|--------|
| EN               | Cu-OFE |
| DIN CEN/TS 13604 | CW009A |
| UNS              | C10100 |

### Chemical Composition (Balance)

Weight percentage

|    |         |   |
|----|---------|---|
| Cu | ≥ 99.99 | % |
|----|---------|---|

### Characteristics

**Cu-OFE** is a high-purity, oxygen-free copper, that does not contain elements that can vaporise in a vacuum environment. It is very thermally and electrically conductive and it also performs extremely well during hot and cold forming. Cu-OFE is corrosion-resistant, especially against atmospheric influences and water, and is also insensitive to stress corrosion cracking.

### Main Applications

**Cu-OFE** is a popular material in electrical engineering, vacuum engineering and the production of high-frequency cables.

### Mechanical Properties (EN 1652)

| Temper | Tensile Strength | Yield Strength Minimum | Elongation Minimum | Hardness  | Bending 90°                |     |
|--------|------------------|------------------------|--------------------|-----------|----------------------------|-----|
|        | Rm               | Rp <sub>0.2</sub>      | A <sub>50mm</sub>  | HV *      | gw rel. Bending Radius R/T | bw  |
|        | MPa              | MPa                    | %                  | HV        | Strip Thickness ≤ 0.50mm   |     |
| R220   | 220 .. 260       | ≤ 140 *                | 33                 | 40 .. 65  | 0                          | 0   |
| R240   | 240 .. 300       | 180                    | 8                  | 65 .. 95  | 0                          | 0   |
| R290   | 290 .. 360       | 250                    | 4                  | 90 .. 110 | 0                          | 0   |
| R360   | ≥ 360            | 320                    | 2                  | ≥ 110     | 0                          | 0.5 |

### Physical Properties

Typical values in annealed temper at 20 °C

|  |               |      |                     |
|--|---------------|------|---------------------|
| Density                                      |               | 8.93 | g/cm <sup>3</sup>   |
| Thermal expansion coefficient                | 20 .. 300 °C  | 17.7 | 10 <sup>-6</sup> /K |
| Specific heat capacity                       |               | 0.39 | J/(g·K)             |
| Thermal conductivity                         |               | 394  | W/(m·K)             |
| Electrical conductivity                      | MS/m          | 58.6 | MS/m                |
| Electrical conductivity                      | IACS          | 101  | %                   |
| Thermal coefficient of electrical resistance | (0 .. 100 °C) | 3.81 | 10 <sup>-3</sup> /K |
| Modulus of elasticity                        | GPa           | 130  | GPa                 |

### Electrical Conductivity

**Fabrication Properties \***

|                           |               |
|---------------------------|---------------|
| Cold Forming Properties   | Excellent     |
| Machinability (Rating 20) | Less suitable |
| Electroplating Properties | Excellent     |
| Hot Tinning Properties    | Excellent     |
| Soft Soldering, Brazing   | Excellent     |
| Resistance Welding        | Less suitable |
| Gas Shielded Arc Welding  | Excellent     |
| Laser Welding             | Fair          |

**Corrosion Resistance \***

**Cu-OFE** is highly corrosion resistant in a natural atmosphere, including sea air environments. It also performs well in industrial and commercial environments, for example for drinking and industrial water, mild alkaline solutions (without oxidants) and with pure water vapour. CU-OFE is also resistant to non-oxidising acids and heat treatments in reducing atmospheres.

**Bend Fatigue (at room temperature)**

The fatigue strength gives an indication about the resistance to variations in applied tension. It is measured under symmetrical alternating load. The maximum bending load for  $10^7$  load cycles without crack is measured. Dependent on the temper class it is approximately 1/3 of the tensile strength  $R_m$ .

**Available delivery forms \***

- Strips in coils
- Traverse-wound coils with drum weights up to 1.5 t
- TECSTRIP®**\_multicoil up to 2.5 t
- Hot-Dip-Tinned strips in thickness range 0.10 up to 1.20 mm
