

TMX Finished Parts 2020

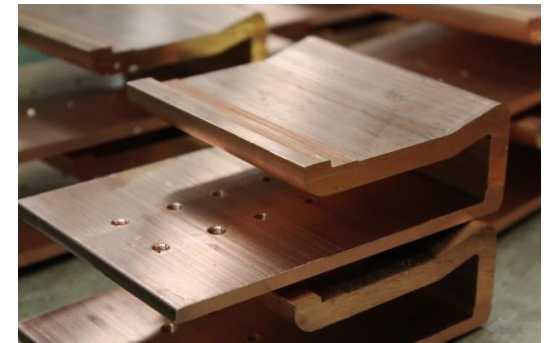

NIEDERBRUCK (FR)

THE HISTORY
OF COPPER

Niederbruck plant main equipment

- ❖ Direct extrusion press
2500 Tons
- ❖ For „semis“ products
4 drawing benches
4 combined drawing lines
2 straightening machines
- ❖ For „components“
2 CNC punching machines
3 sawing machines
2 CNC machining centers
5 stamping presses

High, medium and small
production batches

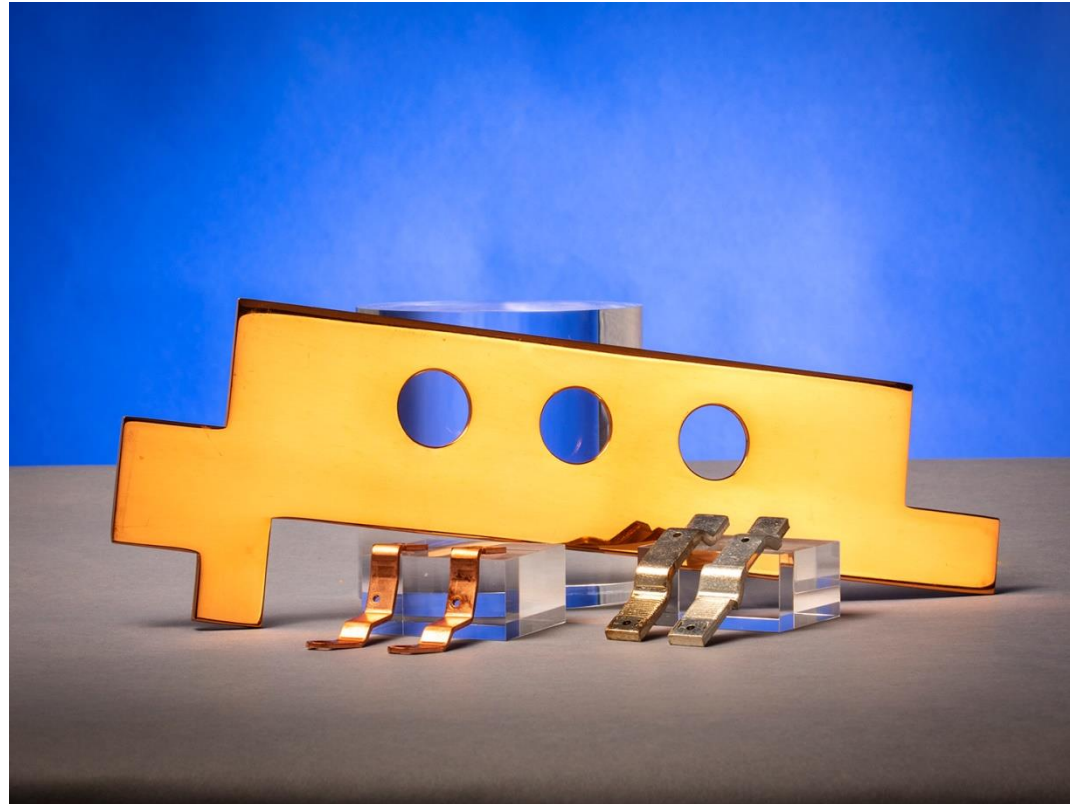

Technical meetings with
our customers

Customized offers and
products

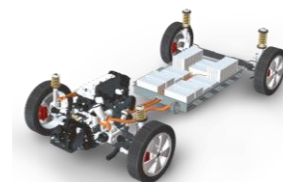

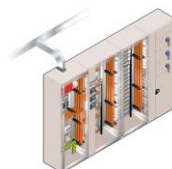

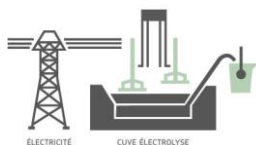

Service – short deliveries/
internal stocks

Various copper and
copper alloys, aluminium

Fast commercial answers

- ❖ Power industry:
Silver bearing profiles, machined parts
- ❖ Distribution and transformation of Electricity:
Stamped parts, punched fold, machined parts
- ❖ Electric Motors:
Rotor flats and profiles, stamped parts
- ❖ Electro metallurgy:
Ingots, sawed rods and flats

- ✦ Kitting and assembling
- ✦ Punched and bend components
- ✦ Stamped parts
- ✦ Sawn parts for cable clamps
- ✦ Sawn part for A/C motors
- ✦ Machined and milled parts
- ✦ Commutators
- ✦ Profiles
- ✦ Flats in coils
- ✦ Specific flats

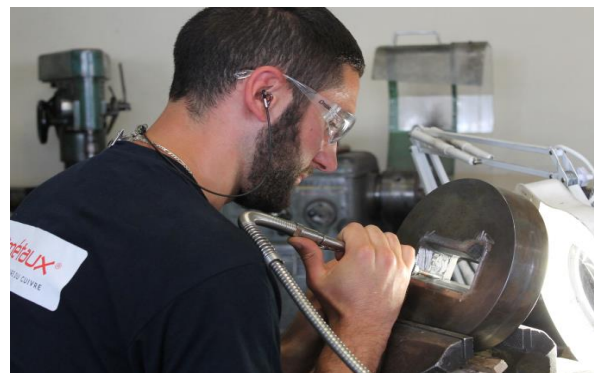

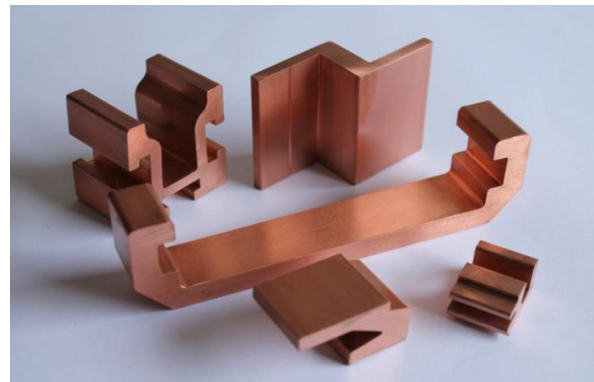

Extruded profiles in lengths and coils

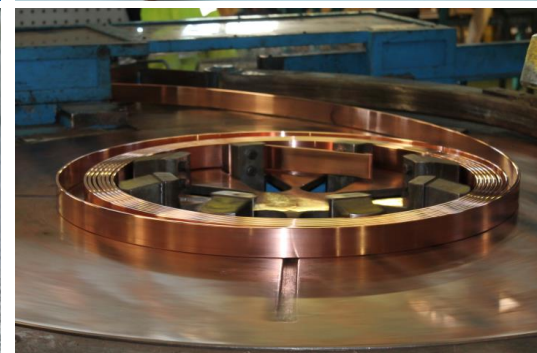

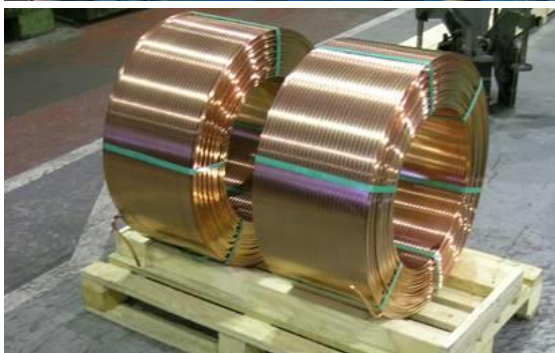

- Over 3,000 existing references of profiles in the Niederbruck plant portfolio

Norm: EN 13605
Hardness: H065 D
Thickness: >3mm in H065
Section: max 5,000mm²

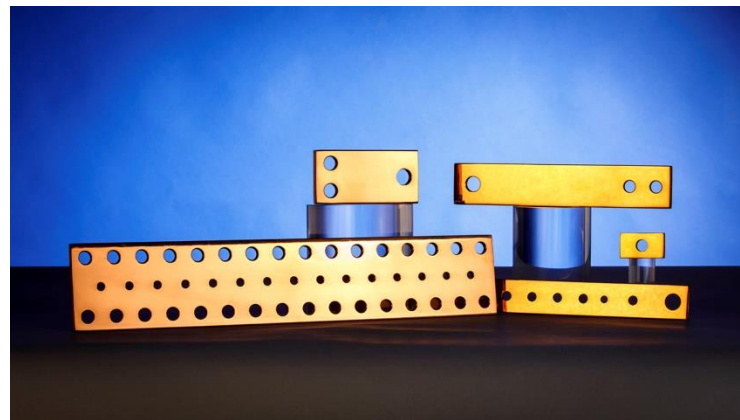

Extruded flat and coils

- Drawn and annealed from 10 sq. mm - 5000 sq.mm in:
 - lengths
 - pancake coils
 - transverse wounded coils

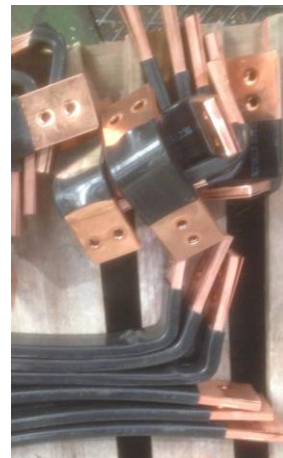

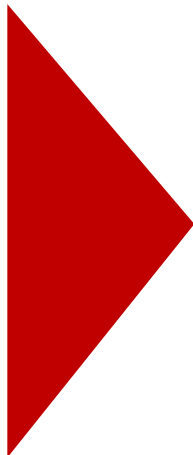

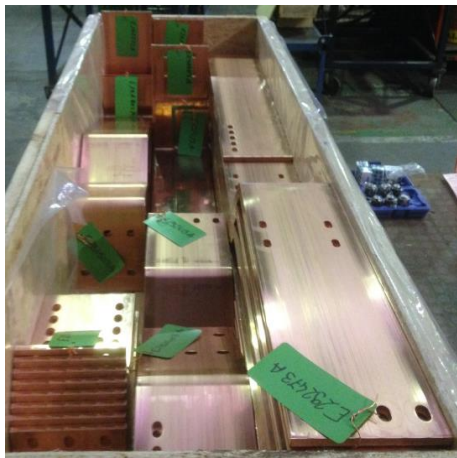

Punched and bend components :

-  Punched parts
-  Bended parts
-  Engraved parts

Busbars and kits for electrical panels

- Fast deliveries
- Excellent customer service
- Kits, punched insulated bars ...

Machined parts made from profiles and flats

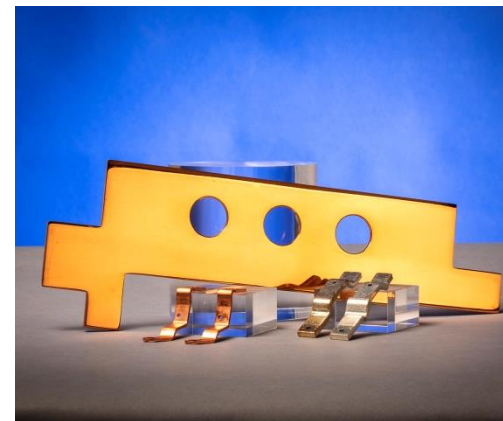

- ❖ CNC machining centres
- ❖ High speed multi pallets
- ❖ From unit part to large series
- ❖ Machining capacities up to 3 meters lengths

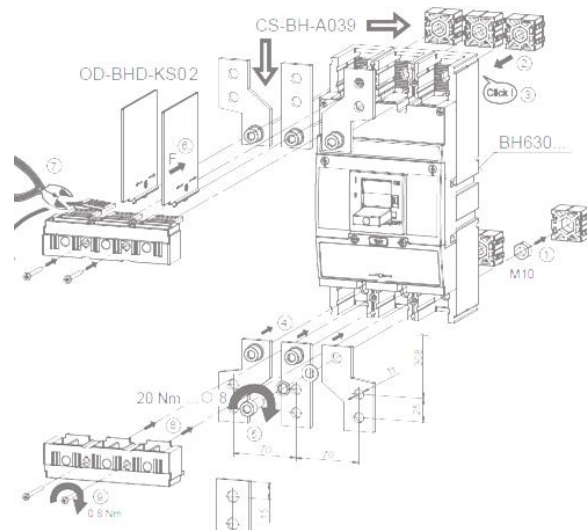

Stamped parts made from coils

- 4 versatile stamping presses
- Stamping tools management

Kitting ready for assembly lines

- ✂ Cutted parts +
- ✂ Screws +
- ✂ Technical notes +
- ✂ Packaging =
- ✂ **Excellent Customer Service**

=

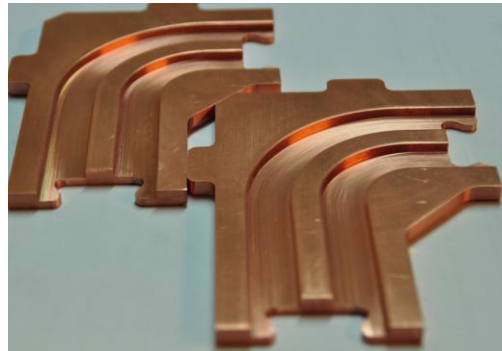

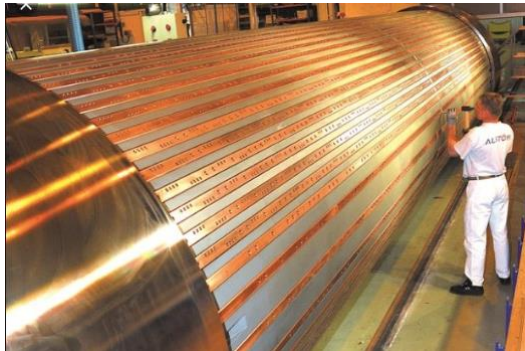

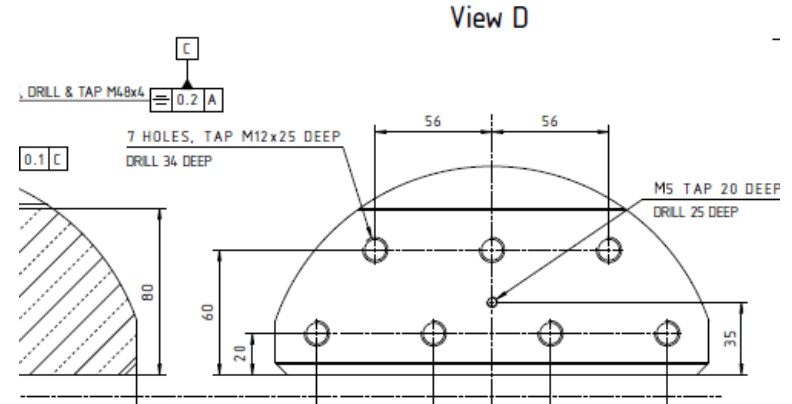

Rotative machines bars and profiles

- Commutator blades up to 120mm heights
- Sawn rotor bars from 10mm² up to 1,000mm²

Profiles and parts for alternators

- Specific flats and profiles
 - silver bearing copper
 - copper alloys
- Components for alternators
