TECU® Brass_brownished

A new kind of Brass –modern and expressive.

Status / 09.08.2019

Architects and designers seeking bespoke and refined surface finishes on TECU® Brass, can enjoy a range of differing burnished TECU® Brass finishes. KME Germany GmbH & Co. KG offers TECU® Brass_brownished with either linear- or circular grinding texture in different shades (extra-light, light, middle, dark, or individual customized for large projects). After grinding and burnishing, the surfaces are given a light wax preservative finish as part of the standard production process. In addition to exterior claddings, all these surfaces are very well-suited to creating impressive and refined interiors.

TECU® Brass_brownished

TECU® Brass_brownished

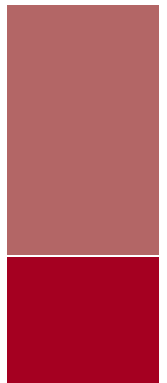

TECU® Brass_brownished

availability / possibilities:

- 8 possibilities are defined and approved for possible productions
- all 8 possibilities are available as TECU® Brass_bond_brownished, too
- In addition finished profiles and elements can be brownished too.

- 4 shades/stages for the brownish of the surface
 - extra-light, light, middle and dark
- 2 grindings of the surface
 - linear grinded and circular grinded
 - the linear grinded ones are standard
 - the circular grinded ones are charged with additional handling costs

dimensions:

- up to length 3000mm → standard 3000mm
- up to width 1000mm → standard 1000mm
- up to thickness 3.0mm → standard 1.0mm

temporary wax fluid protection:

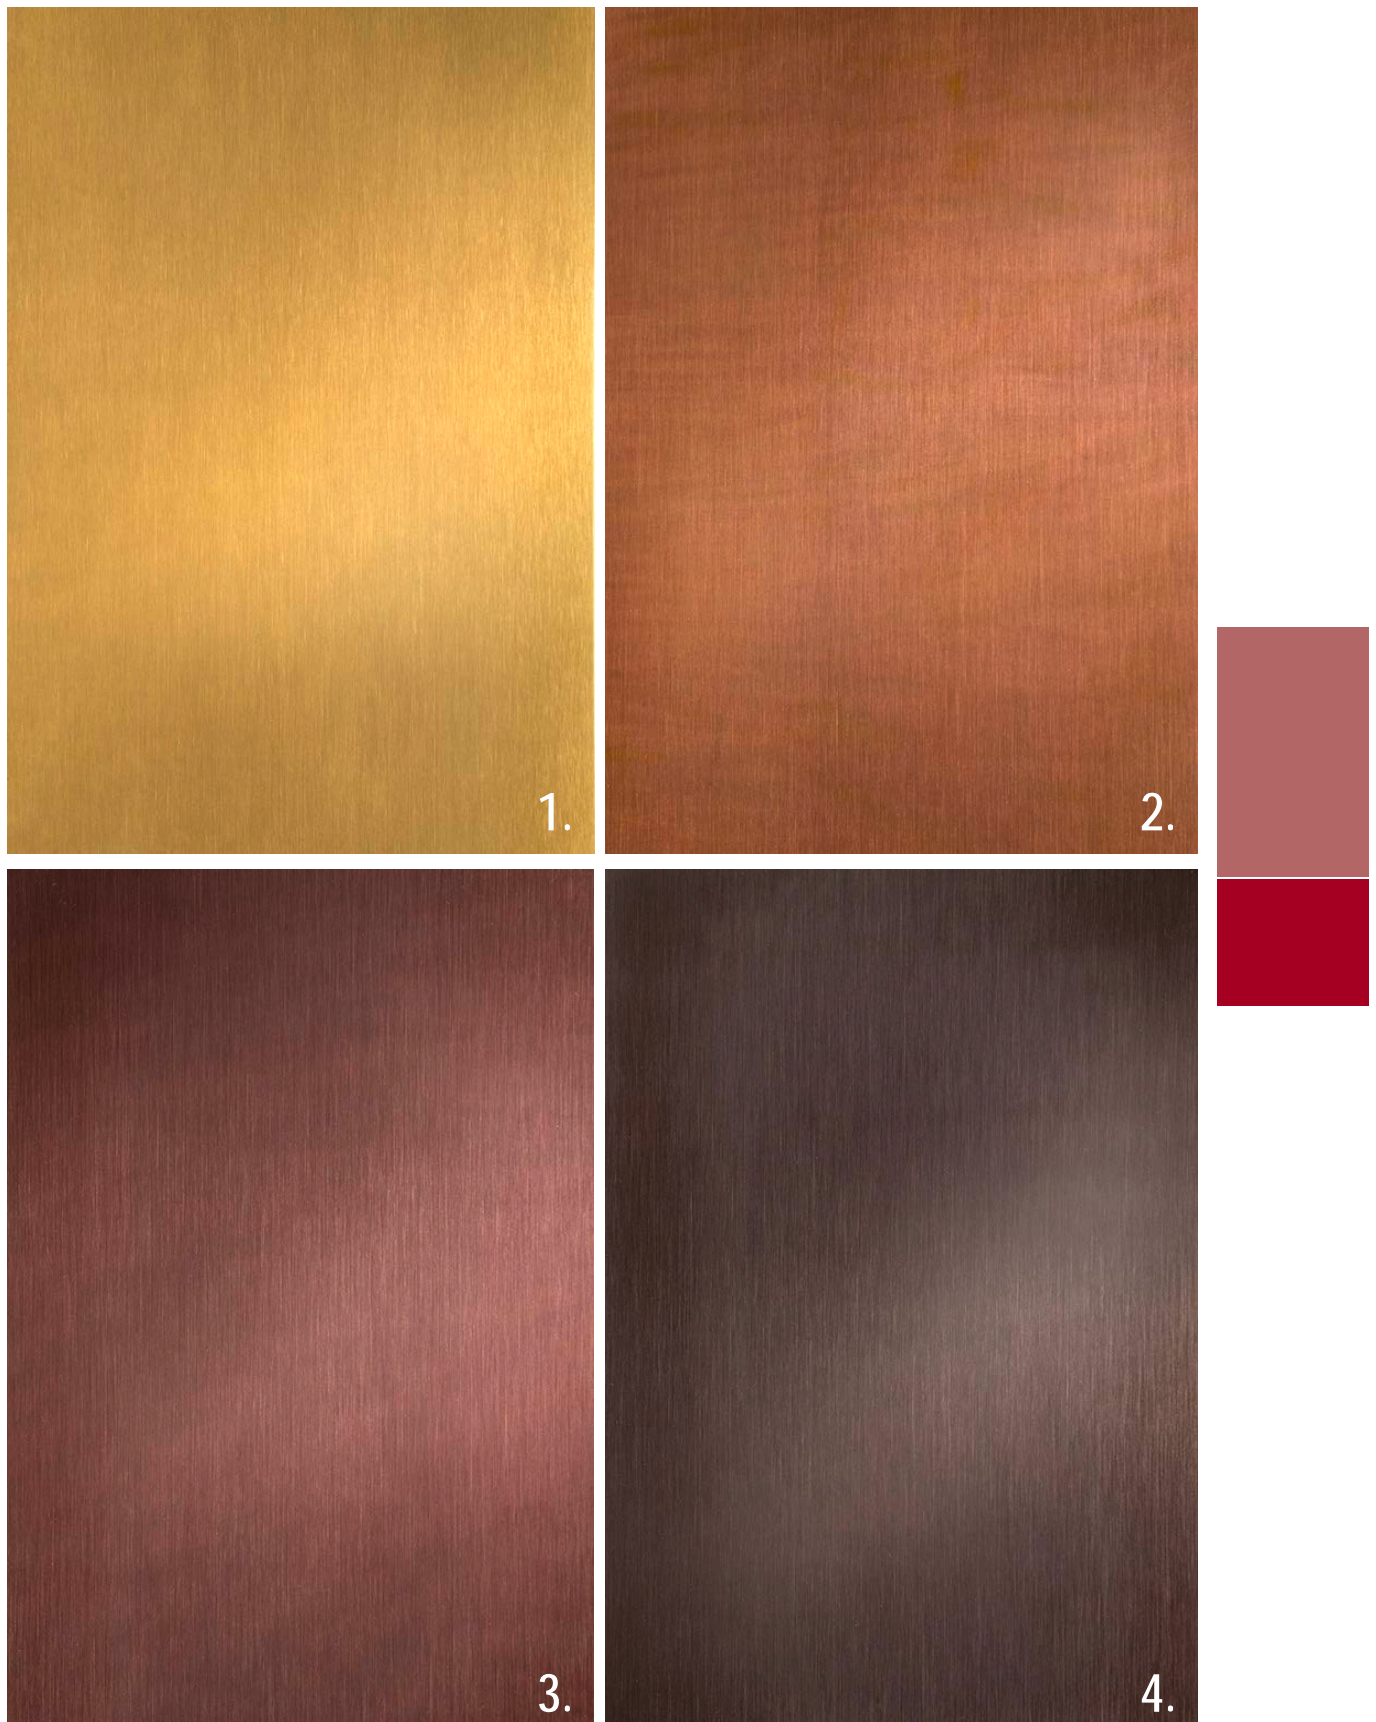

- As standard on the surface a temporary wax fluid protection is applied! This wax fluid is not stable against UV radiation (sunlight) and it weathers off. If used for interior applications no additional surface protection is needed.
